## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 21-41, drawn to a method and a program product for enhancing a selected video frame in a single layer video stream, classified in class 715, subclass 500.1.
  - II. Claims 42-47, drawn to a method for manipulating a video frame in a buffer, classified in class 715, subclass 723.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are directed to related manipulating a video frame. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, invention I is directed to enhancing a selected video frame by incorporating information of other video frames in a same single layer digital video stream whereas invention II is directed to manipulating a video frame stored in a work buffer in which manipulating a portion of said video frame occurs in a processing buffer and combining other manipulated portions of the video frame occurs in a frame buffer.

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

- 4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 5. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cong-Lac Huynh whose telephone number is 571-272-4125. The examiner can normally be reached on Mon-Thurs (9:00-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Hong can be reached on 571-272-4124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
